

CS110 · ACTION 6A · REQUIRED WORKSHEET

C# Code Map

Label what the tutorial code does before you change what it says.

01 Run the tutorial first.

Follow [Ready to Code Some C# NET](#) in Visual Studio. When the app runs, use this sheet to name the parts. Your final pathway app may replace or extend “Hello World.”

Selected context

Use a technical context · Console Status Check

02 Find the parts.

Visual Studio note: A newer Console App may use top-level statements, which means the compiler supplies the Program class and Main method. Label the parts you can see and write “compiler supplies it” for hidden parts.

```
using System;

class Program
{
    static void Main()
    {
        Console.WriteLine("What is your name?");
        string userName = Console.ReadLine();
        Console.WriteLine("Hello, " + userName);
    }
}
```

Library	Class	Main method	Prompt	Input + variable	Output
---------	-------	-------------	--------	------------------	--------

03 Explain each label in your own words.

Class

A container that groups related code.

The face of the project on the backend, through VS, that contains all files and code.

Main method

The method where the console program begins.

The immediate breakaway from the face that contains the code to allow for programming

Method / function

A named action. In C#, a function inside a class is called a method.

A method/function is essentially an action: the `console.WriteLine("is the function to type on a line");`

Variable

A named place that remembers a value.

Input then recall specific information.

Console.WriteLine

Displays a line of text in the console.

The line will show the text of whatever is put within the quotation marks

Console.ReadLine

Waits for typed input and returns that text.

Related to the string, how information can be recalled.

04 Trace the data.

INPUT

The input will be a profile registered/created

VARIABLE

the string stores the personal information

OUTPUT

the console can bring it back to be recalled

o5 Plan your pathway version.

What will you replace or add after the tutorial app works?

Fundraising and Networking with DUFFBeer

Optional ways to go beyond the tutorial

- ☐ Another prompt ☐ A decision or conditional ☐ ASCII art in the console
- ☐ An image in README.md ☒ Another tested feature

o6 Save the evidence.

1. Complete every written section.
2. Select **Print or save PDF**, or take clear screenshots.
3. Place the PDF or screenshots in your GitHub Week6/evidence folder.
4. Commit and push the worksheet with your Action 6A project checkpoint.
